Summary

This state represents the shared-services account following the June migration off Terragrunt. Most core networking and IAM resources predate the migration and were imported rather than recreated, so drift here should be treated as informational until the next reconciliation pass. The SSM parameters under /education/ database are legacy from the earlier pilot program and are scheduled for decommission in Q4.

Comparing **22 instances** in the old state against **0 instances** in the new state: **0 added**, **22 removed**, **0 modified**, and **0 unchanged**. Outputs also changed: **5 outputs** affected.
